

<b>International</b>	
Sector	Maritime hydrocarbon shipping
Liability	Hydrocarbon spill clean-up
References	<p>There is a significant amount of experience in mutual funds/pools in maritime hydrocarbon shipping. Annual reports and other documents are available online from the international oil pollution compensation funds. There is also a significant amount of information on claims. Research has examined correlations with factors such as hydrocarbon type and amount spilled in particular. There have also been attempts to develop formulas and models using factors such as hydrocarbon type, spill amount, geographic location, shoreline type, environmental and socioeconomic features and clean-up strategy. While these should be considered with caution given the limitations of the datasets and the real-life complexities involved, they are indicative of possible approaches to developing formulas or default values.</p> <p><a href="http://www.iopcfunds.org/">http://www.iopcfunds.org/</a></p>
